

Description:

Use the RDP service published on the node to login of the John user using this command:

```
xfreerdp /u:john /p:butterfly1 /w:968 /v:10.10.0.3
```

After gaining access to RDP, discover vulnerabilities that allow you to increase your privileges and exploit them.

Get access to flag (26 letters and numbers) from the file `root.txt` located in the Michael admin desktop folder.

Attacking

- RDP session
